

Password Strength Evaluation

The output shows the successful evaluation of the entered password based on predefined security criteria, including password length, uppercase letters, numbers, and special characters. The program classifies the password as *Weak*, *Medium*, or *Strong* and displays the PASS/FAIL status for each security check, helping users identify areas for improving password security.

Code Implementation Results

```

C:\Users\AA>cd Desktop

C:\Users\AA\Desktop>mkdir Pass_Checker

C:\Users\AA\Desktop>cd Pass_Checker

C:\Users\AA\Desktop\Pass_Checker>nodepad Password_strength_Checker.py
'nodepad' is not recognized as an internal or external command,
operable program or batch file.

C:\Users\AA\Desktop\Pass_Checker>notepad Password_strength_Checker.py

C:\Users\AA\Desktop\Pass_Checker>python Password_strength_Checker.py
=====
      PASSWORD STRENGTH CHECKER
=====
Enter your password: abc

===== RESULT =====
Password Strength: WEAK

Security Checks:
Length (8+ characters): FAIL
Uppercase Letter: FAIL
Number: FAIL
Symbol: FAIL
=====

C:\Users\AA\Desktop\Pass_Checker>python Password_strength_Checker.py
=====
      PASSWORD STRENGTH CHECKER
=====
Enter your password: Password123

===== RESULT =====
Password Strength: MEDIUM

Security Checks:
Length (8+ characters): PASS
Uppercase Letter: PASS
Number: PASS
Symbol: FAIL
=====
```

```
=====
C:\Users\AA\Desktop\Pass_Checker>python Password_strength_Checker.py
=====
    PASSWORD STRENGTH CHECKER
=====
Enter your password: Password@123

===== RESULT =====
Password Strength: STRONG

Security Checks:
Length (8+ characters): PASS
Uppercase Letter: PASS
Number: PASS
Symbol: PASS
=====

C:\Users\AA\Desktop\Pass_Checker>python Password_strength_Checker.py
=====
    PASSWORD STRENGTH CHECKER
=====
Enter your password: Fatima#$@01

===== RESULT =====
Password Strength: STRONG

Security Checks:
Length (8+ characters): PASS
Uppercase Letter: PASS
Number: PASS
Symbol: PASS
